

## A45DE AUTOMATIC TRANSMISSION

### ■ DESCRIPTION

The A45DE automatic transmission is used on the IS200. The pattern select switch is used in all models. Furthermore, the LHD model is provided with a kick down switch.

ATF type T-IV is used in conjunction with the adoption of the flex lock-up mechanism.

The A45DE is optimally matched to the 1G-FE engine, and offers a highly responsive and smooth driving.
