

## Interior Design

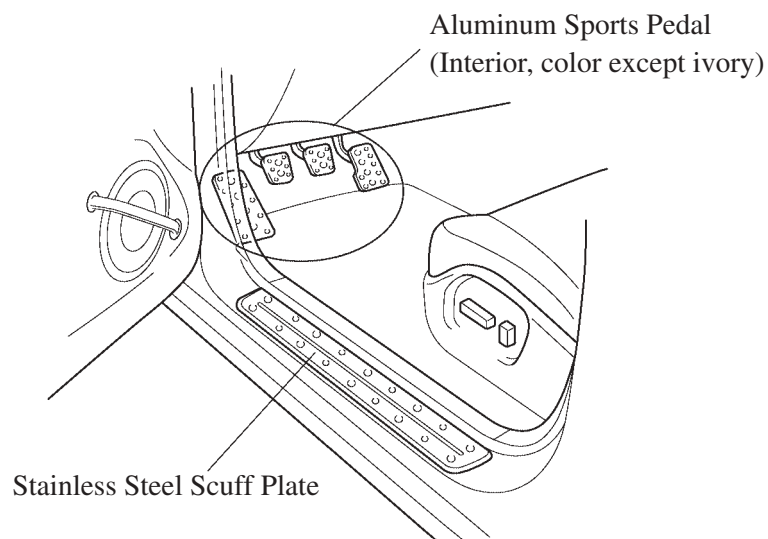

- Controls have been laid out appropriately with "fun to drive" in mind, while a moderate amount of tightness has been applied in order to achieve an image of the frame that supports a high performance machine.
- The well modulated form and the harmonious use of materials create a style that is well-suited to a new-generation front engine rear wheel drive sedan.
- A set that includes a sports steering wheel, Aluminum sports pedal, and stainless steel scuff plates has been made available as optional equipment on all models for athletic looks and realization of the vehicle's basic performance.

### Optional Equipment

163MO06

## ◆ Instrument Panel

- The instrument panel provides a high-density layout of its visual and operating systems in its simple, three-dimensional configuration.
- The black-metallic two-tone instrument panel expresses a well-modulated sportiness.

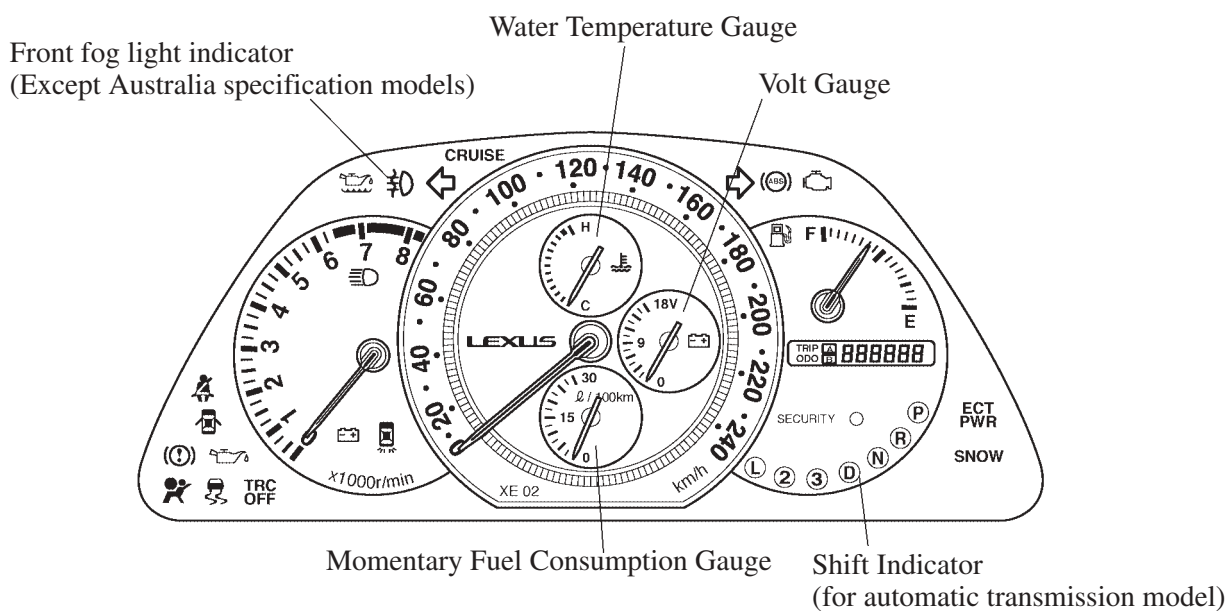

163MO07

## ◆ Combination Meter

- Emphasizing the chronograph style single-eye speedometer in the center, the left dial of the combination meter contains a tachometer, and the right dial contains a fuel gauge, odometer, and shift indicator. The combination meter achieves both innovative looks and ease of view. Also, an momentary fuel consumption gauge has been newly adopted to enable the monitoring of the momentary fuel consumption rate on a real-time basis.

## ◆ Trims & Garnishes

- The ornament portion of the door trim is provided with the same type of reliefs as the upper instrument panel to achieve a uniform interior design.
- The fabric is wrapped all the way up for a luxurious appearance.
- A soft pad is provided in the armrest to soften the touch at one's elbow.
- A fabric outer cover is provided on the upper garnishes and door opening trims for a luxurious appearance.
