

## Automatic Transmission

A newly developed 4-speed automatic transmission has been adopted.

- The ECT-iE (Electronic Control Transmission - intelligent Efficient) system has been adopted for the automatic transmission to effect comprehensive control of the engine and transmission in order to ensure smooth shifting characteristics and fuel economy.
- A gate type shift lever is used to enable shifting with a simple shift lever movement.
- A shift lock system is provided as standard equipment on all automatic transmission models to prevent improper operation of the shift lever.
- A shift knob wrapped with genuine leather is available as optional equipment on the automatic transmission models.
