

# Manual Transmission

A newly developed 6-speed manual transmission has been adopted.

- The 1st and 2nd gears use a triple-cone synchro mechanism to improve the shift feel.
- Closed ratio gears are used for the 2nd to 6th gears to ensure the ease of use.
- The reverse warning buzzer is provided as standard equipment. This function sounds the buzzer to inform the driver that the shift lever is engaged in reverse.
- A sporty, ball-shaped shift knob that is easy to operate is provided as standard equipment on all models.

► Gear Ratios ◀

1st	3.784
2nd	2.175
3rd	1.484
4th	1.223
5th	1.000
6th	0.869
Reverse	3.672
