

■ WAX AND SEALER

Wax and sealer are applied to the hemmed portions of the hood, door panels, rocker panel and luggage compartment door to improve rust-resistant performance.

■ UNDER COAT

PVC (Polyvinyl Chloride) coating is applied to the under side of the body. A thick coating to improve rust resistant performance is applied to the bottom side of the cowl panel, the fender apron and other parts which are subject to damage by flying stones, etc.

■ ANTI – CHIPPING APPLICATION

Anti-chipping paint and PVC chipping primer are applied to the lower door panel area, front and rear wheel arches and the rocker panel area to protect them from flying stones. In addition, soft-chip primer is applied to the hood.
