

■ HEADLIGHTS

1. General

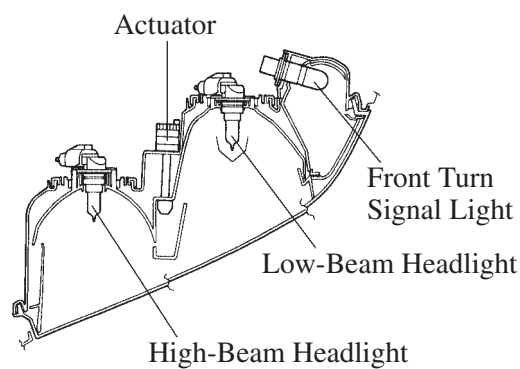

Four sculptured wave-reflector type headlights, in which the low-beam and high-beam lights are mounted separately, have been adopted on all models.

2. Construction

The IS200 has adopted a four-beam type headlight construction in which the low-beam and high-beam headlights are mounted separately in the housing.

3. Wave-Reflector Type Headlight

Through the use of wave-reflectors, the diffusion of light from the headlights in the forward direction and sideways has been increased to improve visibility.
